SUMMARY

Solution architect and data engineer with 10+ years in enterprise healthcare data. I turn raw, fragmented healthcare data into scalable, secure cloud systems that power better decisions and real financial impact, with experience spanning Cerner, Epic, and modern lakehouse platforms (Databricks, Snowflake, Azure, AWS).

SKILLS

Cloud & Data Platforms	Databricks, Azure Synapse, Azure Data Factory, Azure Key Vault, AWS Redshift, AWS S3, Apache Spark, Snowflake, DBT
Languages	MS/Oracle SQL, T-SQL, Python, PySpark, R, Go, Scala, SnowSQL
Tools & Virtualization	Docker, Tableau, Power BI, Alteryx, Azure DevOps, Jira, Informatica, SSIS, Hadoop, Denodo, QlikView
Domains	Solution Architecture, Data Modeling, Data Governance, CI/CD, ML & AI Integration, SAFe Agile, Data Mining, Payer Data

EXPERIENCE

Business Intelligence | **Deaconess Health System** — Apr 2026 – Present
Evansville, IN

- Partner with quality and clinical stakeholders to drive performance across HEDIS, CMS Star Ratings, Joint Commission, Leapfrog and HCAHPS.
- Advise a legacy-to-cloud data modernization effort built to scale with the organization.

Founder & Principal Architect | **The Data Lab** — Feb 2025 – Present
Grand Rapids, MI

- Run an advisory venture helping teams make smarter decisions about data, from modern cloud architecture to healthcare analytics strategy.
- Guide partners through complex problems with clear thinking and pragmatic design.

Solutions Architect | **Cedar** — Jun 2025 – Feb 2026
New York City, NY

- Designed scalable, secure architectures integrating enterprise healthcare clients with Cedar Pay, Pre and Cover.
- Simplified billing complexity and streamlined revenue cycle operations while ensuring seamless interoperability with EHRs and legacy systems.

Solutions Architect & Data Engineer | **Nordic Global** — Feb 2025 – May 2025
Madison, WI

- Led the design and implementation of cloud-native data pipelines and warehouse architectures for structured and unstructured data.
- Aligned data strategy with business goals and enforced governance, validation and quality frameworks.

Data Engineering Consultant | **Tegria** — Dec 2023 – Feb 2025
Seattle, WA

- Built scalable, cloud-native data solutions that helped healthcare organizations modernize their analytics infrastructure.
- Delivered robust pipelines and cloud migrations optimized for performance and cost.
- Implemented governance frameworks that maintained data integrity and compliance.

Senior Analytics Director | **Health Catalyst** — Aug 2021 – Dec 2023
Salt Lake City, UT

- Promoted from Senior Analytics Engineer to lead a team of consulting analysts.
- Translated executive objectives into analytics strategy using Tableau, Alteryx and Power BI.
- Integrated Databricks, Spark and Azure, and championed SAFe Agile delivery.

Senior Application Developer | **Corewell Health** — Jul 2016 – Aug 2021

Grand Rapids, MI

- Advanced through four progressively senior roles on the data warehousing team.
- Built HIPAA-compliant pipelines and integration frameworks.
- Worked extensively with Cerner EMR and the Epic Nexus transition, and supported enterprise-scale system acquisitions.

SELECTED PROJECTS

Unified billing platform integration | **Clearview · Clearway · Consensus**

Led multiple CedarPay implementations across enterprise healthcare organizations, building a reusable Athena-based code-generation framework that cut developer effort by hundreds of hours and timelines by up to 50%. **$700K–$1M+ annualized · 93–95%+ PSAT**

Cloud-native AWS data platform | **Geisinger Health**

Designed and built a streaming-enabled AWS platform integrating siloed healthcare data sources into a scalable architecture, improving real-time analytics and business intelligence. **Real-time streaming analytics**

Population health data migration | **Bon Secours Mercy Health**

Led population-health initiatives streamlining payer and community-program data into Databricks on Azure, improving accessibility and supporting actionable insights. **Databricks on Azure**

Data modernization strategy | **Baylor, Scott & White**

Centralized pharmacy, medicine and ordering data in Snowflake and DBT, driving cost, adherence and dispensing-trend analysis. **Snowflake + DBT**

Large-scale cloud migration | **St. Luke's University Health**

Executed a large-scale migration of on-premise systems to Azure-based infrastructure, enhancing scalability, security and real-time analytics across the network. **On-prem to Azure**

Quality metrics enhancement | **Innovative Healthcare of Indiana**

Built data pipelines and reporting frameworks to track and improve HEDIS, CMS Star Ratings, Joint Commission, Leapfrog and HCAHPS measures, driving higher hospital ratings, stronger patient satisfaction and improved reimbursement. **HEDIS · CMS Stars · HCAHPS**

CERTIFICATIONS

Databricks	Azure Databricks Platform Architect, Generative AI, Lakehouse
Epic	Cogito, Caboodle Data Model, Clinical Data Model, Clarity Data Model, Caboodle Development, Caboodle-Clarity Development
Health Catalyst	Analytics Engineer III, Healthcare Operations, Subject Area Marts, IDEA, Atlas
Snowflake	Hands-On Essentials: Data Warehouse
ClickUp	Project Management (Novice & Intermediate)

EDUCATION

Davenport University | **M.B.A., Strategic Healthcare & Business Management** — 2015 – 2018

Grand Valley State University | **B.S., Molecular Biology & Biostatistics** — 2011 – 2014
